2GO! SYSTEM

Two wires that give a new twist
to your life.

Today, all you need are two wires to obtain all you want from a video doorphone system. With the new 2GO! system, you can go beyond basic functions and add color (the color TV camera is standard), connect to 4 monitors in parallel in the apartment without having to install an extra power supply unit, without forgetting the possibility of intercommunication of up to eight calls in the apartment and between apartments. With just 1 power supply unit in the system and 2 non-polarized wires in any part of the building, you can install up to 32-user systems with up to 3 audio/video call stations. 2GO! provides the heart of the system; it's then up to you to dress it up, choosing from the full array of monitors in the Urmet Domus catalogue. With 2GO!, your video doorphone system takes front stage.

2GO! SYSTEM

The video doorphone system with 2 non-polarized wires

There's no denying that 2GO! systems simplify life, also offering a suite of absolutely genial features. 2GO! is the simplest and also the most innovative solution available today.

First of all, you can use the two wires everywhere and connect up to 32 users without any difficulty. You can also install up to 4 monitors in parallel without extra power supply units.

To cater to all types of requirements, select the monitor you prefer from the best the Urmet catalogue has to offer: Sentry, Atlantico b/w or color. With 2GO! all you need is a single 10 DIN module power supply unit for the entire system. Other characteristics include call to the floor, the possibility of choosing between 6 ringers and a differentiated tone for different system calls.

No matter what you have come up with, it'll be a lot easier with just 2 wires.

Handy, reduced-size distributor (4 x 4 cm).

If you have designed something very complex, Urmet 2GO! immediately makes it easy.

The system is so versatile that it offers really interesting capabilities.

Such as the possibility of creating an 8-call mixed intercom system (between different apartments and inside the same apartment). Or of activating up to 3 entrance panels without any relay, also of the principle-secondary type.

Without forgetting the possibility of programming cyclical surveillance on 4 external control TV cameras and trouble-free interfacing with PABX without adding wires in riser.

With also audio-video auto-activation. With 2GO! you can use the Sinthesi analogue entrance panel with digitizer. Because 2GO! offers you the best in the easiest and fastest way.

2GO! SYSTEM

BASIC ELEMENTS
Ref. 1082/72 The 2GO! video doorphone door speaker unit
is complete with loudspeaker, microphone and color TV
camera. It is equipped with 2 buttons to call 2 users.
It is equal in size to 2 Sinthesi modules.

Ref. 1082/7** Doorphone door speaker unit.
Complete with loudspeaker and microphone and is used as
secondary in 2GO! systems; the installation must however include
at least one door speaker unit 1082/72.
It is equal in size to 1 Sinthesi module.

Ref. 1082/20 2GO! video power supply unit
Pre-engineered for fitting on DIN bar (10 modules).
The only one present in the system, it supplies both bus and video
power. Pre-engineered for 5-branch connection which may be
outside stations or stair risers according to type of system.
Power supply: 230Vac, 50Hz.

Ref. 1704/701 Wall bracket kit for Sentry+ monitors 1704/1A and 1704/10A.
Consisting of the bracket with operating electronics 1704/82 and
single-user distributor 1082/51.
Pre-engineered for call to the floor and for call repeat.

Ref. 1702/701 Wall bracket kit for Atlantico b/w monitor 1702/1
and color 1702/40.
Consisting of bracket with operating electronics 1702/82 and
single-user distributor 1082/51.
Pre-engineered for call to the floor and for call repeat.
May also include key add-on 1082/96.

Ref. 1082/80*** 2GO! special decoder
Used for activation of loads by users, opening of vehicle
entranceways, switching on of stair lights or other forms
of activation through closing/opening of a contact.
Fitting on DIN bar (6 modules)

Ref. 1038/17 16-user expansion module
Small module to be connected to outside stations 1082/72 and
Ref. 1082/7. To increase the number of call buttons that can be
managed. Each expansion module controls 16 buttons.

Ref. 1182* 2GO! doorphone
With Atlantico styling, it comprises a door release key plus 3 keys
for additional services or for intercom calls. It also features 3-position
call regulation with mute function and mechanical on/off readout.
Pre-engineered for call to the floor or for call repeat.

Ref. 1782/501 2GO! single-family video kit
The Kit includes:
Door speaker unit with TV camera
Embedding box with surround and module-holder frame 1145/62
Power supply unit on 10 DIN module bar 1082/20
1 Atlantico video doorphone system 1702/1 c/w bracket 1702/82

*   Available from March 2005
** Available from April 2005
*** Available from May 2005
